# CORTADORA MANUAL CON GUÍAS CONECTABLES

# **DUROLL®**

## ■ ACCESSORIES

3X Extendable as needed with additional guides

1X Guide car with extreme scoring wheel

3X Suction cups

1X Pliers with rubber protection

1X Slim separator

## ■ EXTENSION STRETCH MODULE

## ■ OPERATIONS GUIDE

1. Connect the guide rails with a wrench at the connection part.

2. Install suction cups on the guide rail.

3. Mark the position where you want to cut. Align the edges of the gauge to the position.

4. Make one continuous motion scoring on the tile with the guide car.

5. Align the center of the separator with the cutting line and apply increasing pressure on it until the tile snaps along the score line. Use pliers to gently clamp the edges of the tile to help it break off.
